Questions to National Coordinators

- Why on Earth did the NCs take the positions as NC and what did they expect from it when they really understood the project and the project objectives?
- Afterwards the moderator would like to focus on how the NCs organized the work to be done. What did they learn and what will they recommend for similar future tasks?
- Secondly the moderator would like to focus on the communications the NCs received and how they used it in the project. What did they learn and what do they recommend for similar projects?
- Finally the moderator would like to ask the NCs what it takes to implement the project and its findings through out their own countries.
- Last the moderator will seek to involve the audience with some follow up question to the subject.
